WIRELESS BLADE CONTROL

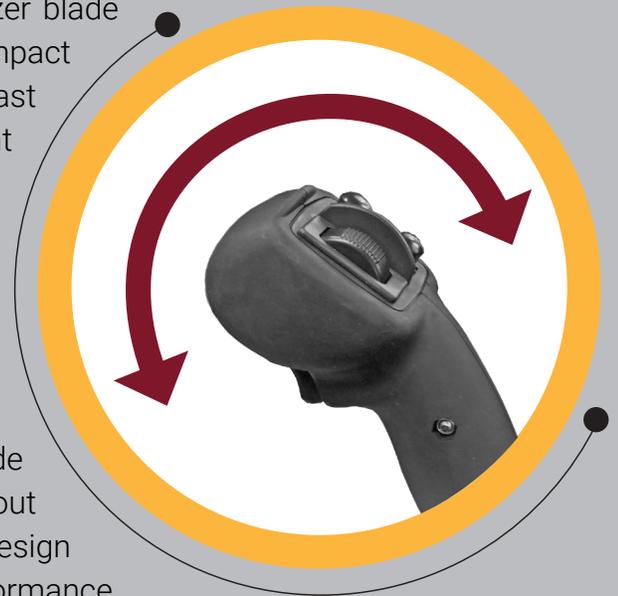

By QuadGrade

## Complete wireless control of the grader blade from your joystick

Control your SharpGrade grader blade just like a six-way dozer blade with SimulGrade. Designed to be compatible with modern compact track loaders operating electronic joysticks - SimulGrade is fast and easy to install, and is easily swapped between different machines and brands.

World-first features include the ability to transition between zero cross coupling and 100% cross coupling modes - giving you full control of the blade without any external wiring, or raise and lower scarifiers or hydraulic retract wheel assemblies all from your existing factory fitted joysticks.

Designed with your safety and comfort in mind SimulGrade delivers complete control of your SharpGrade grader blade without any additional buttons or switches, and the dual redundancy design and integrated failsafe systems deliver unsurpassed performance, reliability and peace of mind.

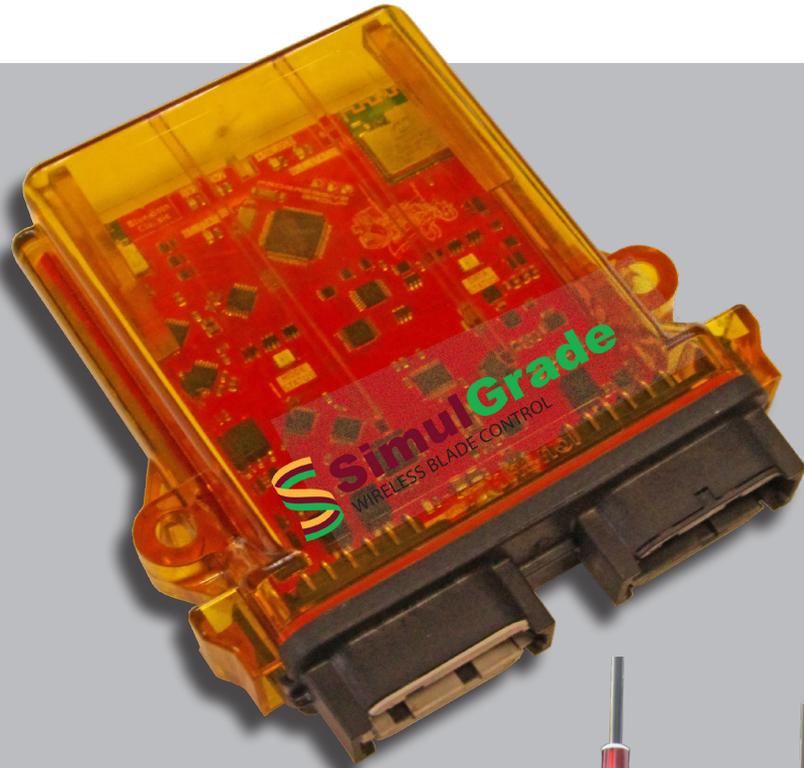

## WHY SIMULGRADE?

- Complete SharpGrade blade control from your factory fitted joysticks
- Dual redundancy design for maximum safety
- Quick Plug and Play installation - no external wiring
- Easily switch between Machine and Grader modes
- Operate all functions simultaneously
- Selectable scarifier and hydraulic wheel retract modes
- Wired and Wireless options
